

One-ton Model

AgriKit converts farm water to:

- generate hydroxide ion (OH), copper ion & ionized particles;
- disinfect many viruses, bacteria & larvae;
- exterminate mildew & fungus;
- degrade harmful chemicals.

Applying AgriKit in farm drinking water
=> These benefits plus copper ion can substantially reduce having diarrhea and promote hog's growing.

AgriKit

A practical tool for farm water management

Improving overall farm productivity:

- reducing odors;
- inhibiting diseases in soil;
- reducing larvae in pool;
- rinsing meat for preparation;
- rinsing fruits & vegetables;
- general cleaning;
- hands washing;

AgriKit technology is:

- Environmentally friendly
- Cost effective
- Easy to operate
